## Essay: Technical Education"

"Education is not preparation for life; education is life itself"

Education is the process of acquiring knowledge, developing the powers of reasoning and judgment, and generally preparing oneself for mature life. It makes anyone complete, accurate and worldly-wise. It is important and significant for every individual. Education makes a man realize himself and his goals and how to achieve them.

The principal goal of education is to create men who are capable of doing new things, not simply repeating what other generations have done.

There are many kinds of education. General or liberal education means learning for learning's sake. It trains people in philosophy, history, literature and humanities etc. Social education teaches us how to lead a good life in a society. It produces good and civilized citizens.

Religious or spiritual education moulds our characters and make us virtuous and pious. But vocational or technical education is not learned for learning's sake only. but it enables us to practice our learning to earn a living.

Technical education may be defined as the practical application of scientific studies to the teaching of some trade, profession or handicraft.

"I had to gain experience as I didn't have a

This is the age of Science and technology. Trends are changing time for the sake of economic stability we have to set-up more and more industries, to run and maintain these industries. We need technical experts. For this purpose we should make technical education popular.

The modern age is the age of machine the machine has entered to the soul of our social life and no aspect of society is complete without it. Even the smallest thing in our daily use is in many manufactured after 7 or 8 several mechanical process. Hence there is a great need technicals and skilled workers. A labourer who works on the machine should be

Should possess a thought  
knowledge of that machine  
of importance of technical  
education is increasing day  
by day it is the only  
way to built up the  
economy under develop and developing  
countries The scope of the  
technical education is to extensive  
Science mostly depend on  
technical minds. The industrial  
revolution is based on technical  
education

“Man loves to wonder  
AND That is a seed  
of science”
