Essay :-

Technical Education

This is the age of science. Science is very important for progress. Pakistan is a developing country. Our literacy rate is very low. We should concentrate on technical education. It will prepare skilled people. They can get decent employment not only in the country but also in abroad. We have seen the advantages of computer education. The computer experts can get employment easily.

"I had to gain experience as I did not have a technical education."

Mikhail Kalashnikov

There are many advantages of technical education. It is not very costly. It does not take a long time to get technical education. People can learn a trade from six months to two or three years at most. Our country

technical and computer education. It will increase our productivity.

"Education technology is very important because we have a massive challenge in public schools."

We can make fast progress through technical education. It is the need of the hour. We should encourage people to get technical education. Technology is an important aspect of life. We use technologies for our ease and comforts. Not only in our daily life but also in research centres, no nation could generate the progress unless it promotes technical aspects in its field.

"New technology is common, new thinking is rare."

There are many benefits of technical education. It solves the problem of unemployment by supplying the industries with a large number of trained workers. A country can also increase its material resources through technical education. It imparts dexterity, skill, habit of neatness and order. People begin to have faith in the dignity of labour. We can also earn foreign exchange by sending our technicians to other countries. Thus, technical education makes a country

rich, prosperous and resourceful.

"Technology is just a tool.

In terms of getting the kids working together and motivating them, the teacher is most important."

The homes of the well-to-do are seldom without refrigerators, air conditioners, and a hundred odd gadgets. Even war and victory is today tied up with a variety of sophisticated machines. In the world, thousand of machines are working round the clock to meet our demands. Evidently, efficient technical hands are needed to keep them well alied and running.

"Technical education along-with general education is as much important for a country as the air for the survival."

The solution of raw material in our country is that we must switch our ~~country~~ economy from agriculture to industry. Technical and vocational centre should be opened even in small cities to provide skilled woman, workers and technicians. Since most of the population in Pakistan is rural and therefore there is a need to develop rural industries. These industries would be based on

from lands, livestock farms and fruits farm etc.

"Philosophy bakes no bread."

The food processing is one of the successful industries in world and there could be focus in Pakistan too. Our Government is giving full attention to the technical education.

New technical institutes and engineering colleges are being established. In Pakistan, there are many institutes which support the technical courses. ZNEU university, Kaschi university, Mehran university etc.

In short, technical education is a field which takes care of developing special skill sets which ultimately determine the students' employability or otherwise.

"The fate of modern industrial society rests in the hands of the education."
