SUBJECTIVE TYPE

PART - I

SHORT ANSWERS

Q-NO-2

i) BRYOPHYTES AS AMPHIBIANS

Bryophytes are known as amphibians of plants because they can't live without water and they require water for their reproduction.

ii) IMPORTANCE OF ALTERNATION OF GENERATION

It is a very important phenomenon which provides continuous genetic variability and selection for the best genetic makeup for survival and adaptation in the changing environment.

iii) ARTHROPHYTES

The plants belonging to sporophytes are called arthropytes because their whole body consists of joints.

(N) HORNWORTS AS ADVANCED BRYOPHYTES

Hornworts are advanced bryophytes because their sporophyte is not dependent upon ~~for~~ gametophyte for nourishment. It can get its own food ~~rather~~ ^{rather} than because they have stomata and chloroplasts.

(iv) GENERALIZED LIFE CYCLE OF BRYOPHYTE
