

LGS GROUP OF COLLEGES

A PROJECT OF LAHORE GRAMMAR SCHOOL

Name: Jaweria

Class: 11th

Roll No. 3

Subject: Biology

Test No. _____

Date: 22-11-24

SUBJECTIVE TYPE

Q-2

SHORT ANSWERS

i. AMPHIBIANS OF PLANT

The bryophytes are said to be the amphibians of the plant world because they cannot live away from water. They need water for reproduction.

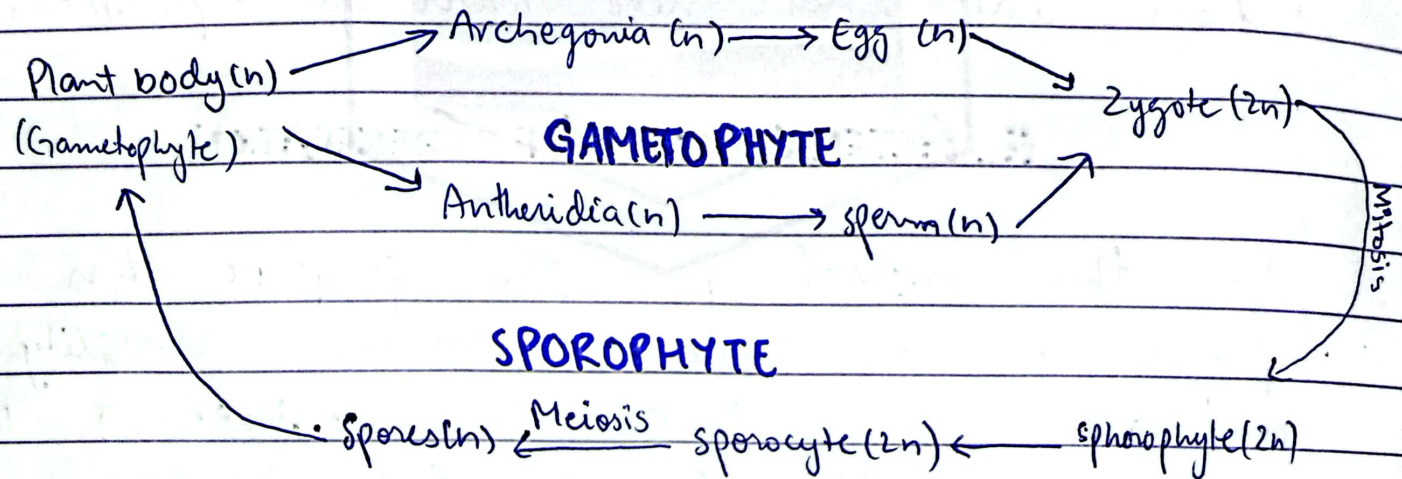

ii. ALTERNATION OF GENERATION

In this natural process, the sporophyte thus provide a large amount of genetic variability and nature selects the best genetic combinations. In the long run, this will allow the populations to become increasingly better adapted to their environment.

iii. REASON

Plants belonging to sphenopsida are also called arthrophytes because the whole plant body is composed of large number of joints.

iv. LIFE CYCLE

v. HORN WORTS

Because the gametophyte is highly lobed and irregular in outline. Except for a little early stage of development, the sporophyte is not dependent upon gametophyte for nourishment and protection.
