(Assignment Computer)

(Section B)

(Question no 2)

Answer the following question.

(P)

Password

(Answer)

Password is a secret word to protect a computer system or program. It may consist of numbers, alphabets or both. The user has to type the password to access the computer.

(ii)

Virus can damage computer.

(Answer)

A computer virus can damage data or software on the computer. It can delete some or all files on the computer system. It can destroy all data by formatting hard drive. It may display a political or false message every few

times.

(iii)

List some reasons of data loss.

(Answer)

- i Sabotage
- ii Machine Failure
- iii Software Error
- iv Human Error
- v Power Failure

(Pv)

Differentiate between intentional and un-intentional threats?

Intentional Threats

→ A hacker can delete data on a computer.

→ An angry employee of the organization can delete the data.

Un-Intentional Threats

An technical Failure of the hardware may damage the data.

A sudden power Failure may also cause data loss.

(v)

Differentiate between infected and activated File?

Infected

The computer can be protected from infected USB Flash drive by scanning USB Flash drive before transferring any data from it.

Activated

When the computer virus starts working, it is called the activation of virus. A virus normally runs all the time on the computer.
