## Essay on Technical Education.

The education which provide special practical knowledge and skill is known as technical education. it is different from general education. it makes learners well-skilled in the special field such as engineering, medical, law etc. technical education concern with technology. People who have skill and knowledge are called technicians. Technical education plays the vital role for development of a country. technicians are needed in every field of construction, to make factories, roads, bridges, buildings etc. if a country own sufficient technical hands it undoubtedly accelerates the pace of development. in order to produce electricity

to work in mines, to grow enough crops and vegetables and so on we need different types of technicians. Technical education is very important to solve the problem of unemployment. They help in very fields. Technical hands do not need to request others to give education makes people independent. Technical education helps us to alleviate the gravity of problem of unemployment.

The economic progress of the nation depends on technical hands. Every country should give high priority on technical education to uplift the prosperity of nations.
