5				10				15				20				

## Assignment

### (Question #1)

### (Essay Writing)

### (Technical Education)

"Science is a key which  
unlocks for mankind a store of  
nature."

In the present day of keen competition and hard struggle, general education is found to be sadly insufficiently to procure for man his livelihood. The number of men with general education is legion and all the various departments where these men can be provided are literally packed. The unemployment problem is growing keener and keener everyday and unrest and discontent are daily gaining ground.

Technical education means teaching students and others some practical or mechanical art. It includes training in trade, commerce, carpentry, weaving, agriculture, medicines and engineering. It helps to meet the needs of today's world of machines. Those who get such education become technical experts or technicians.

"Technical education is not only a ladder of opportunity, but it is also an investment in our future."

Technical education plays a very pivotal role in the modern age. It produces engineers, builders, doctors and technicians. It promotes the material and economic advancement. People begin to have faith in the dignity of labour. We can save a lot of foreign exchange if we have our own technical experts.

"Man loves to wonder and that is the seed of science."

Technical education is lacking in Pakistan. Our schools and colleges produce men who are fit only to be clerks. Our youth hankers after office jobs. They dislike to work in factories and hate to learn practical skills. This is why unemployment is on the rise in the country. Poverty in Pakistan is due to the neglect of technical education. Our country is rich in raw

material resources, but we cannot enjoy the advantages only because we are not equipped with any technical knowledge.

"Science is nothing but  
trained and organized  
common sense."

We can make speedy agricultural progress by using machines. To become self-sufficient in food, we shall have to set up industries that produce agricultural machines. We need a great number of highly qualified technical experts and well-trained technicians to handle, look after and repair machines. This is possible only if we have schools, colleges and universities where technical and scientific education is imparted to the students.

"The goal of education is  
understanding, the goal of  
training is performance."

Pakistan is a developing country. We have to build new roads, hospitals, bridges and dams, and for this we need engineers and skilled workers. We should be able to use our natural resources like coal, gas and electricity to make Pakistan a developed country.

"Education is the most powerful  
weapon that we can use to change the world."

In all important cities of Pakistan, technical schools and institutions are being opened every year. We need more and more institutions.

"Technology will never replace great teachers, but technology in the hands of great teachers is transformational."

The idea of the dignity of labour should be popularized among the students. They should be encouraged to get technical education for their bright future. In spite of the immense value of technical education, the attitude of educated people towards it is not what it should be.

"The hands that draft the future are the hands that have been trained by technical education."

Even in the field of medicine, technical education is equally necessary. This is the reason that modern medical science used a wide range of technical tools. To use these tools the operator must have the knowledge about them.

"A society that invests in technical education is a society investing in its future."

Also, a technical diploma in surveying and architecture allows a student to get knowledge about using the complicated tools involved in the process of surveying and architecture.

"The great end of life is not knowledge but action."

In short, technical education makes a country rich, prosperous and resourceful, but it has certain limitations also. Too much of technical education changes a man into a machine. We should never lose our sense of proportion. We should also have an element of liberal education in technical education.

"A man of science is just a student of nature and derives his inspiration from her."

---
