

## Experiments of making pictures

The idea of making pictures might have come for many reasons to human mind. He would have drawn some tangle lines to start the picture.

### Carving

and engraving from bones were while putting off the meat. Man made tools, he must have been carved lines on the surface of bones and came across with an idea of

### Engraving

Shadows: when they used to lit the caves they must have seen the shadows of the uneven surface on walls of the caves which might be resembled to strong images.

## Reasons for making pictures

There is always some reason for the birth and development of art and so has the upper Paleolithic age art.

- Hunting
- drawing pictures was the absence of a written language
- fertility
- Types of Venus
- aesthetic

## Material for making pictures:

Colour: first they obtained colours by grinding different minerals and soil. Red, brown and black were obtained from soil, black, red, brown and purple were obtained from many
