QUESTION-2

(i)

PASSWORD:

A pass is a secret word, used to protect the data stored on a computer. It protects data from being lost, misused or deleted by any person. It protects the data stored on a computer. Password consists of number, alphabets or both. The user has to type the password to access the computer system.

(ii)

DESTRUCTION CAUSED BY VIRUS:

Virus can corrupt files, making them unusable or causing data loss. They can slow down the system. Virus can replicate themselves and attach copies of itself with many other files. It can also spread from one computer to another computer.

(iii)

Infected File

Activated file

Definition:-

Definition:-

An infected file is a file that contains malicious code (a virus) but has not been executed or caused harm.

• **State:**

- Dormant or inactive

An activated file is an infected file where the virus has been executed, triggering its malicious behaviour.

• **State:**

- Active and performing malicious actions.

(iv)

Reason for data loss:

Data is lost due to following reasons:-

- 1- Computer viruses
- 2- Hardware destruction
- 3- Software corruption.

(v)

Intentional Security threats

- 1- Intentional security threat means that an unauthorized user will delete or change the data in the computer system.

• **EXAMPLE:**

- Sabotage
- Profit

Un-Intentional Security threats

Un-intentional security threat means that an authorized user will mistakenly delete or change the data in computer system.

• **EXAMPLE:**

- Sharing files against protocol
- Social engineering.
