Assignment

ESSAY:

Technical Education

"Science is a key which unlock for mankind a state of nature"

(Samuel Johnson)

In the present day of keen competition and hard struggle, general education is found to be sadly insufficient to earn for man his livelihood. The number of men with general education is countless and all the various departments where these men can be provided jobs are literally packed. The unemployment problem is mounting everyday so unrest and discontent are daily gaining ground.

Technical education means teaching students and some practical

or mechanical art. It includes training in trade, commerce, weaving, medicines and engineering. It helps to meet the needs of today's world of machines. Those who get such education become technical experts.

Technical education plays a very pivotal role in the modern age. It produces engineers, doctors and builders. It promotes material and economic development. People begin to have faith in the dignity of labour. We can earn a lot of foreign remittances by supplying technical labour to other countries.

“Man loves to wander and that is the seed of science.”

(Emerson)

Technical education is lacking in Pakistan. Our schools and colleges produce individuals who are fit to be clerks. Our youth hankers after office jobs. They dislike working in factories and hate to learn practical skills. This is why unemployment is on the rise in the country. Poverty in Pakistan is due to the neglect of technical education.

"Science is nothing but trained and organized common sense."

(Huxley)

We can make speedy agricultural progress by using machines. We need to great number of highly qualified technical education and well trained.

This is possible only if we have schools, colleges and universities where technical and scientific education is imparted to the students.

Pakistan is a developing country. We need to build new roads, bridges hospitals and dams.

"A man of science is just a student of nature and derives his inspiration from her" (Romans)

In short, technical education makes a country rich, prosperous, but it has certain limitations also. Too much of technical education changes a man into a machine. We should never lose our sense of proportion. We should also have an element of liberal education in technical education.
