COMPUTER ASSIGNMENT

CHAPTER No: 06 (M.C.Qs)

1	D	Computer Security
2	C	Physical Security
3	D	Piracy
4	C	Finger Print
5	C	Loss of Data.

SUBJECTIVE TYPE

SHORT ANSWERS

-: (i) :-

PASSWORD:- A password is a combination of letters, numbers or special character that ensures security by allowing access only to autherized users. It prevents unautherized access to a system or data.

-: (ii) :-

DAMAGE OF COMPUTER VIRUS:- A computer virus damages a computer by: →

INTENSIONAL SECURITY THREATS :

There are deliberate actions, such as hacking, phishing and malware attacks, aimed at harming systems or stealing data.

UNINTENSIONAL SECURITY THREATS :

These occur accidentally, such as user errors, hardware failures, or software bugs, causing damage or data loss without malicious intent.

1: Corrupting or deleting data files.
2: Slowing down the system's performance.
3: Damaging hardware components like the hard drive.
4: Spreading across the network to other systems.

-:(iii):-

INFECTED FILE	ACTIVATED FILE
• A file that contains a virus but has not yet executed the malicious code.	A file where the virus has been triggered and has started its harmful operations, such as destroying data or spreading to other files.

-:(iv):-

REASONS FOR DATA LOSS :-

1: Accidental deletion or overwriting of files.
2: Virus or malware attacks.
3: Hardware failure, such as a hard drive crash.
4: Power failure or unexpected shutdowns.
5: Natural disasters, such as floods or fires.

-:(v):-
